Shorepower Advances in Clean Tech Open Competition

Transportation infrastructure company a finalist in the leading clean tech business competition

Bellevue, WA, June 26, 2009 – Shorepower Technologies is honored to be chosen to participate in the final rounds of the Pacific Northwest's Clean Tech Open, the inaugural version of the national business plan that started in California and has assisted more than 100 companies get off the ground.

Shorepower is among 12 semi-finalists chosen from a field of 56, with the next round of winners picked in September. In addition to educational seminars and mentoring, the final 12 also get to participate in intensive business training sessions over the next few months. The semi-finalist group includes eight teams from Washington, three from Oregon and one from Idaho.

About the Clean Tech Open. The Clean Tech Open is the world's leading clean tech business competition, and will award over \$1 million in prizes this year. Since it's founding, 84% of Clean Tech Open Alumni are still viable businesses and have secured more than \$125 million in funding. For more information, visit www.cleantechopen.com.
